It is our great pleasure to formally announce the XXVI IFCC WorldLab Congress, which will be jointly hosted by the IFCC, Arab Federation of Clinical Biochemistry (AFCB), and Saudi Society of Clinical Chemistry (SSCC). This will be the first time the WorldLab is being held in the Middle East and Arab world, taking place in the opulent city of Dubai from May 26-30, 2024.

We invite all of you to participate in this premier scientific event, which will feature lectures, symposia, recent advancements in clinical practice and science, poster presentations, industry exhibits, as well as other innovative and diverse education opportunities. Importantly, this leading forum enables scientific exchange and advancement in the field of laboratory medicine and clinical chemistry by bringing together scientists, laboratory specialists, clinicians, academics, and industry colleagues. As such, attendees will have the chance to interact with distinguished experts from around the world.

Alongside the comprehensive scientific program, Dubai provides the perfect setting for a fantastic social program. One of the world's most popular tourist destinations, Dubai with its magnificent geographical location is a cosmopolitan metropolis with something to offer for every visitor, including contemporary architecture, beaches, diverse culture, and more. It is also accessible via direct flight from most major cities around the world, making it a perfect destination for all WorldLab attendees.

Our field is confronting a time of many changes and technological advancements, allowing for a much greater role for laboratory professionals as partners in the centre of healthcare. The IFCC organization is thus pleased to partner with AFCB and SSCC to hold the 2024 WorldLab Congress. Bringing all of us together in forums like this will ensure that our organizations and the field of laboratory medicine remain at the cutting edge.

The conference organizing committee and scientific organization committee are working hard to bring this very special event to life and planning excellent scientific and social programs. Stay tuned for more information on the 2024 WorldLab Congress over the coming year!
